Julien VANHAREN

Ph.D. in Computational Fluid Dynamics

Personal Data

PLACE AND DATE OF BIRTH: Soissons, France | July 31, 1989

> French CITIZENSHIP:

> > PHONE: +33 (0)6 60 74 88 16 EMAIL: julien.vanharen@inria.fr WEBSITE: https://jvanhare.github.io

ADDRESS: 36, rue Frédéric Chopin, 91210 Draveil France

Professional Experience

Research fellow OCT 2022

Inria Saclay in Palaiseau, France

Meshing, anisotropic mesh adaptation and high-order numerical methods

Anisotropic unstructured mesh adaptation. Numerical schemes for Computational Fluid Dynamics (CFD). Reynolds-

Averaged Navier-Stokes (RANS) and Large Eddy Simulation (LES). High Performance Computing.

JUN 2020

Research engineer

ONERA in Châtillon, France **SEP 2022**

CEDRE developer

CEDRE is a multi-physics platform working on general unstructured meshes intended to both advance research and process industrial applications in the fields of energetics and propulsion. High-order and high-fidelity numerical methods. High Performance Computing optimization.

MAY 2017

Postdoctoral fellow

MAY 2020

Inria Saclay - Île-de-France in Palaiseau, France

Time-accurate anisotropic mesh adaptation for fluid-structure interaction (FSI) simulations

Implementation and validation of the Finite Element method for the unsteady linear elasticity equations. Coupling with a code solving the Euler equations based on the Finite Volume method. Development of error estimates for fluid-structure interaction applied to unsteady anisotropic mesh adaptation. Project RAPID funded by Direction Générale de l'Armement

EDUCATION

MAY 2014

Ph.D. in Computational Fluid Dynamics

APR 2017

AIRBUS & Université de Toulouse in Toulouse, France

High-order numerical methods for unsteady flows around complex geometries

Collaboration between AIRBUS and CERFACS. Several numerical methods and codes are investigated for industrial applications. The coupling with a nonconforming grid interface of high-order schemes for structured and unstructured zones in elsA. The Spectral Difference Method in JAGUAR. The Lattice Boltzmann Methods in ProLB.

JUL 2016

Argonne Training Program on Extreme-Scale Computing (ATPESC)

AUG 2016

Argonne National Laboratory (ANL) in Lemont, IL, USA

Intensive, two-week training on the key skills, approaches, and tools to design, implement, and execute computational science and engineering applications on current high-end computing systems and the leadership-class computing systems of the future

Computer architectures and predicted evolution. Numerical algorithms and mathematical software. Approaches to building community codes for HPC systems. Data analysis, visualization, I/O, and methodologies and tools for big data applications. Performance measurement and debugging tools.

SEP 2012

M.Sc. Fluid Dynamics

lun 2013

ISAE-SUPAERO in Toulouse, France

SEP 2009 M.Sc. Aerospace and Aeronautical Engineering

JUN 2013 | ISAE-SUPAERO in Toulouse, France

TEACHING

ОСТ 2022 ОСТ 2023	Anisotropic unstructured mesh generation for complex geometries Université Paris-Est Créteil (UPEC) in Créteil, France
Jun 2019	Incompressible fluid mechanics [MF102] ENSTA Paris in Palaiseau, France
MAY 2016	Fundamentals to understand and analyze high fidelity compressible Large Eddy Simulation (LES) CERFACS in Toulouse, France

LANGUAGES

English	Full working proficiency
FRENCH	Native proficiency
GERMAN	Good working knowledge
Polish	Basic communication skills

THESIS

[17] Julien Vanharen. **High-Order Numerical Methods For Unsteady Flows Around Complex Geometries**. PhD thesis. Université de Toulouse, 2017. [PDF].

PEER-REVIEWED JOURNAL ARTICLES

- [10] Julien Vanharen, Adrien Loseille, Frédéric Alauzet, and Micheal Andrew Park. Nearfield anisotropic mesh adaptation for the third AIAA Sonic Boom Workshop. J. Aircr. (2022). [10.2514/1.C036502].
- [13] Julien Vanharen, Adrien Loseille, and Frédéric Alauzet. Non-manifold anisotropic mesh adaptation: application to fluid-structure interaction. *Eng. Comput.* (2021). [10.1007/s00366-021-01435-2].
- [18] Julien Vanharen, Guillaume Puigt, Xavier Vasseur, Jean-François Boussuge, and Pierre Sagaut. **Revisiting** the spectral analysis for high-order spectral discontinuous methods. *J. Comput. Phys.* 337 (2017), 379–402. [10.1016/j.jcp.2017.02.043].
